Open Source Contributions

sveltejs/svelte | 87k+ stars | Core UI framework

PR #18521 | Merged

- Entered an unfamiliar compiler codebase, traced an AST scope-binding failure, implemented the fix, and added regression coverage that passed maintainer review and CI.

prisma/prisma | 47k+ stars | TypeScript ORM

PR #29701 | Accepted Upstream

- Reproduced and isolated a SQL result-decoding defect, added a focused correctness test, and validated the fix across a large production data-access codebase.

supabase-js & supabase/ssr | Official SDK & Auth

PR #2537 | #258 | Merged

- Improved shared SDK behavior for REST API errors and browser-session teardown, strengthening reusable client logic, authentication reliability, and testable failure handling.

refined-github | 31k+ stars | 100k+ developers

PR #9777 | Shipped

- Fixed case-sensitive conventional-commit parsing and validated browser behavior, improving consistency in a widely used developer productivity tool.

Selected Engineering Projects

Tray | Full-Stack SaaS Ordering & Payments Platform

GitHub | Live

- Shipped student, kitchen, and admin product flows across React/Next.js, Node.js services, PostgreSQL, and real-time state updates, turning product requirements into production-ready features.
- Integrated Razorpay webhooks and P2P UPI with HMAC verification, idempotency, Redis rate limiting, and retry-safe state handling; debugged failures across APIs, callbacks, WebSockets, and database state.
- Maintained regression checks and CI/CD release validation while resolving production defects using logs, SQL inspection, root-cause analysis, and targeted test coverage.
- Stack:** TypeScript, JavaScript, React, Next.js, Node.js, PostgreSQL, Redis, REST APIs, WebSockets, AWS EC2, GitHub Actions, CI/CD

Unhold | AI-Assisted Financial Workflow Platform

GitHub | Live

- Built a full-stack product across React/Next.js interfaces, Node.js APIs, PostgreSQL workflows, authorization, evidence handling, and review-before-send controls, owning features from implementation through deployment.
- Engineered a 5-agent asynchronous workflow with claim, retry, reclaim, dead-letter, SQL state transitions, and deterministic fallbacks to preserve reliability when external services fail.
- Wrote Playwright/Vitest functional, integration, edge-case, and regression coverage and used structured logs plus CI gates to debug, test, and validate releases efficiently.
- Stack:** TypeScript, React, Next.js, Node.js, PostgreSQL, REST APIs, AI Agents, Playwright, Vitest, GitHub Actions, CI/CD

AquaVision | Python Data Processing & Web Service

GitHub | Live Demo

- Developed a Python/Flask service that classifies 9 image-degradation categories and routes each request through modular processing paths behind clean API boundaries.
- Improved restoration quality by +3.6 dB PSNR and optimized CPU-only inference to 0.8s per image through profiling, benchmarking, and iterative bottleneck analysis.
- Created a 17-route Pytest smoke/regression suite, containerized the service with Docker, and automated validation through GitHub Actions before cloud deployment.
- Stack:** Python, Flask, PyTorch, OpenCV, REST APIs, Pytest, Docker, GitHub Actions, Azure, SQLite

Skills

Programming & Core CS: Java, Python, TypeScript, JavaScript, C++, SQL; Data Structures & Algorithms, Object-Oriented Programming, Object-Oriented Design, design principles, problem solving

Full-Stack Development: React, Next.js, Node.js, Express.js, Flask, HTML5, CSS3, REST APIs, JSON, WebSockets, responsive web applications, reusable components and APIs

Data & Backend Systems: PostgreSQL, MongoDB, Redis, Supabase, SQLite, relational/NoSQL concepts, data modeling, transactions, asynchronous workflows, API integrations

Testing & Engineering Quality: Pytest, Playwright, Vitest, unit/integration/E2E/regression testing, debugging, root-cause analysis, performance profiling, clean/maintainable code, code reviews

Cloud, DevOps & Delivery: Git/GitHub, GitHub Actions, CI/CD, Docker, AWS EC2, Azure, Vercel, Linux/Unix, deployment, logging/monitoring fundamentals, SDLC, Agile/Scrum

AI-Assisted Development & Collaboration: AI agents/LLM workflows; ChatGPT, Claude, Codex, GitHub Copilot familiarity; technical documentation, ownership, fast learning, cross-functional collaboration

Education

Jawaharlal Nehru Technological University Anantapur (JNTUA)

Aug 2022 – 2026

B.Tech in Computer Science & Engineering | CGPA: 7.5 / 10.0
